B Blade cutting
C Tear resistance
D Perforation

Use only within the risks covered above

Maintenance :

The washing of gloves or mittens can alter the performance , so it's not recommended to wash them. Grease or oil on a glove can ignite, a wet glove transmits faster heat. it is not advised to wash them.

Storage : Protected from the light and in a dry place, free of moisture, oils, greases...

Recommandation : contact until 450°C - the top of the glove protects the back of the hand against radiant heat and metal projections. Complete with appropriate PPE.
